

Iciniti Portal

Your Portal to Better
Customer Service

Help Your Customers Help Themselves

It used to be that customers could only make payments by mail. And if they wanted to view their payment history, they needed to get written permission from your accounts department. Those days are ancient history.

Welcome to Iciniti Portal

Great customer service is all about convenience. Iciniti Portal lets you offer your customers a new level of convenience by giving them instant access to their account records.

ANYTIME, ANYWHERE With Iciniti Portal, there's no wrong time or place for customer service. Iciniti Portal lets your customers view their payment histories and access old credit and debit notes at any time and from any place. They can reprint old invoices with a few mouse clicks. And if you have the integrated Iciniti Credit Card app, they can even pay their bills online.

ON ANY DEVICE If your mobile device has a web browser, it is compatible with Iciniti Portal. That means your account reps and your customers will be able to access accounts and payment histories directly from their mobile devices.

ALWAYS SECURE And because we store all credit card information in gateway vaults that meet the latest PCI security standards, you never have to worry about security being compromised.

Iciniti Portal is compatible with Sage 300 ERP, versions 6.0, 2012, and 2014. Order it as a stand-alone or as part of the eCommSuite.

Iciniti Portal is one of three custom web applications available jointly in Iciniti's eCommSuite, bringing you the scalable flexibility to take care of your current customers and plan for future ones.

ECOMMSUITE ALSO INCLUDES:

ICINITI CREDIT CARD Our new PCI 3 certified credit card app takes the work and the risk out of receiving payments by credit card. Full automation means no input errors, and no more wasting time waiting for authorization. And since it's fully integrated into your Sage 300 ERP system, data is only entered once, saving you time and money.

ICINITI ORDER READER Iciniti's Order Reader hands the data entry task over to your customers, giving them full control over their order and freeing your staff from a time-consuming responsibility. Optionally, you can even have orders from your Amazon, Yahoo or eBay accounts flow seamlessly into your sage 300 ERP.
